SUMMARY

Systems-focused Software Engineer with 2+ years of experience building enterprise data pipelines, backend infrastructure, and Kafka-driven integrations using TypeScript and PostgreSQL, with optimizations that reduced financial report retrieval from hours to seconds.

SKILLS

Programming Languages	TypeScript JavaScript Python
Backend & Architecture	Node.js Express.js Flask Apache Kafka Event-Driven Architecture REST APIs
Frontend & Client-Side	React.js TSX Redux Ant Design Office.js
Database & DevOps	PostgreSQL MongoDB Prisma ORM Docker Git Postman
AI & Automation Tools	Azure OpenAI Groq API LLM Integration Prompt Engineering AI Agents Function Calling RAG Cursor AI Claude Code Codex MS Power Automate

EXPERIENCE

Satva Technolabs Private Limited	Jul 2024 - Jul 2026
<i>Software Engineer – Full Stack</i>	<i>Ahmedabad, Gujarat</i>

Distributed Financial Data Integration Platform

- Built an asynchronous, Apache Kafka-driven data integration pipeline for an enterprise credit card network, enabling reliable, queued synchronization of 7 core financial entity types across NetSuite and QuickBooks schemas.
- Implemented a unified accounting data model with resilient, bidirectional mapping layers to normalize complex, decoupled transactional payloads into a standardized canonical internal format.
- Containerized microservices using Docker to eliminate environment discrepancies, streamline local testing workflows, and ensure consistent deployment across scalable infrastructure pipelines.

Xero-Integrated Excel Add-in

- Automated the retrieval and formatting of organization-specific Xero data and reduced report generation time by building an Excel add-in with React.js, Ant Design, and Office.js for 50+ in-house users.
- Enabled 50+ in-house users to pull live P&L, Balance Sheet and Trial Balance reports from Xero with custom formatting applied automatically in under 5 seconds, with full dynamic date range support.

Loyalty Program Management Platform

- Contributed frontend development in a team of 3 on a highly detailed mobile-first loyalty platform (Android and iOS tested), with 100+ Figma screens covering hotel booking, flight booking and gift card redemption with points.
- Built a seamless booking experience comparable in depth to consumer travel apps, with drawer-based navigation and dynamic catalog integration.

Multi-Platform Order & Product Synchronization

- Built a unified operations layer for a UK skincare brand (100+ orders/day) connecting Xero, HubSpot and Linnworks, giving the business a single source of truth across inventory, orders and financials.
- Delivered scheduled and instant incremental sync with live status tracking, reducing manual reconciliation and giving the ops team clear visibility into failures and cross-platform data flow.

PROJECTS

A Safety Wearable Device for Industrial Workers

- Built a Zigbee-based wearable system to monitor worker safety in high-risk environments.
- Developed dashboards for real-time alerts and risk tracking.
- Recognized as a winner of the Smart India Hackathon (G20 Azadi Ka Amrit Mahotsav).

EDUCATION

Bachelor of Technology in Information and Communication Tech.	Jul 2021 - May 2024
<i>Marwadi University</i>	<i>Rajkot, Gujarat CGPA: 7.78</i>
Diploma in Information and Communication Technology	Aug 2018 - May 2021
<i>Marwadi University</i>	<i>Rajkot, Gujarat CGPA: 8.00</i>
